OWNER GUIDE

For Dontrise. This is how to run the shop's website and bookings from your phone. Everything here happens at **yoursite/admin** (the address Visualize gave you). If something looks wrong, the last page says who to call.

SIGNING IN AND CHANGING YOUR PASSWORD

1. Open **yoursite/admin** on your phone and tap **Sign in**.
2. Type your email and password. Tap **Sign in**.
3. The first time, the site asks you to choose a new password. Pick one with at least 12 characters that is not a word people could guess.

1. To change it later: tap **More** at the bottom, then **Account**, then fill in **Current password** and **New password** and tap **Change password**.

1. Lost your phone? On Account, tap **Sign out on every device**. Then sign in again on the phone you have.

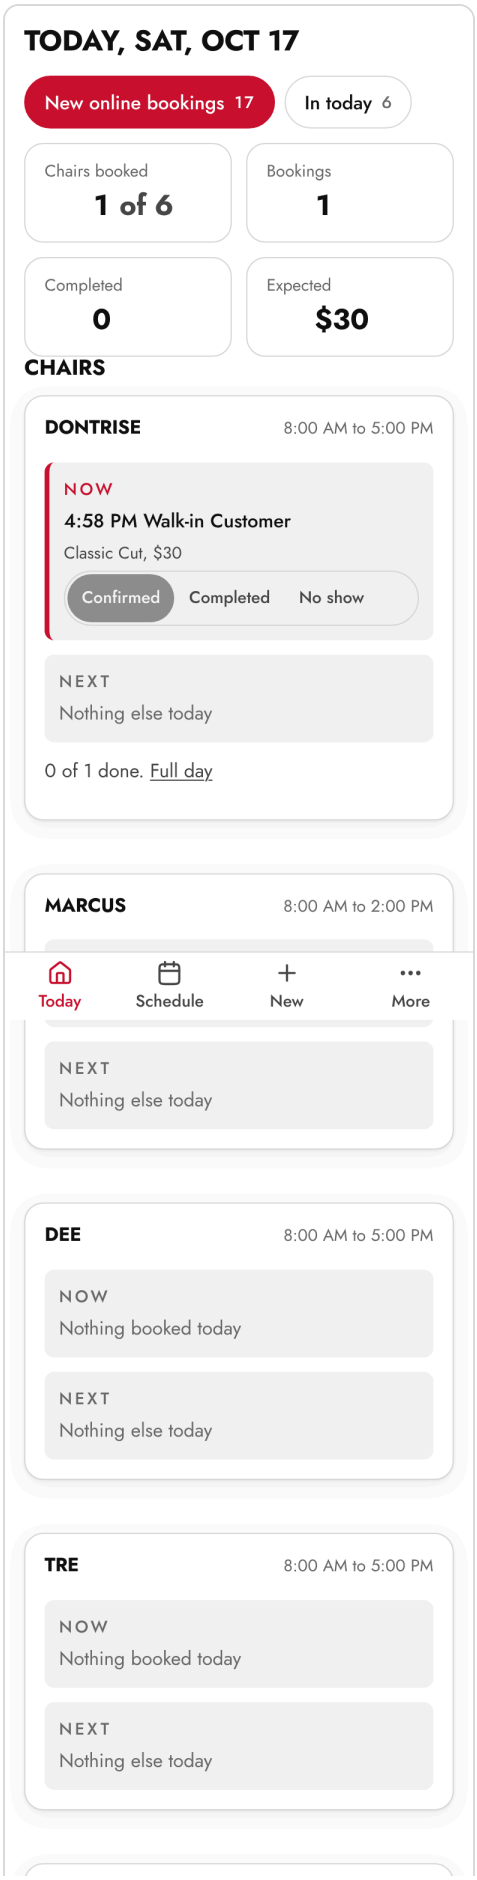

READING TODAY

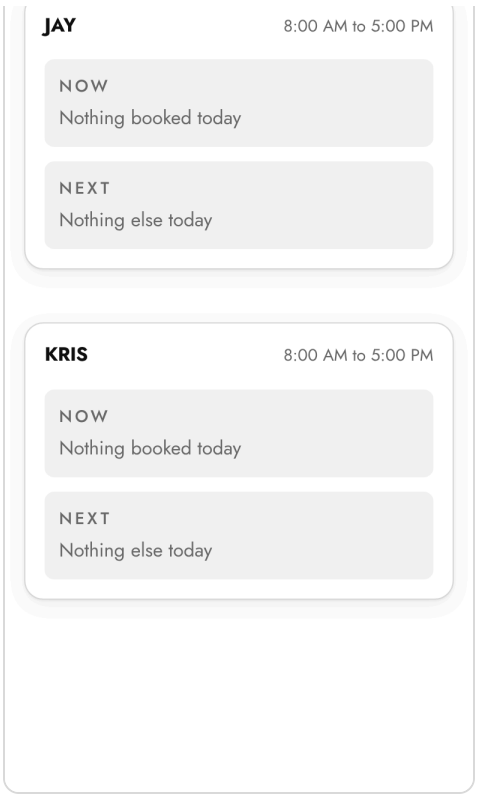

Today is the first screen after you sign in. Across the top: how many chairs are booked today, how many bookings, how many are done, and the money expected.

New online bookings shows how many people booked on the website since you last looked. Tap it to see them.

Below that, one card per chair. **Now** is who is in the chair right now.

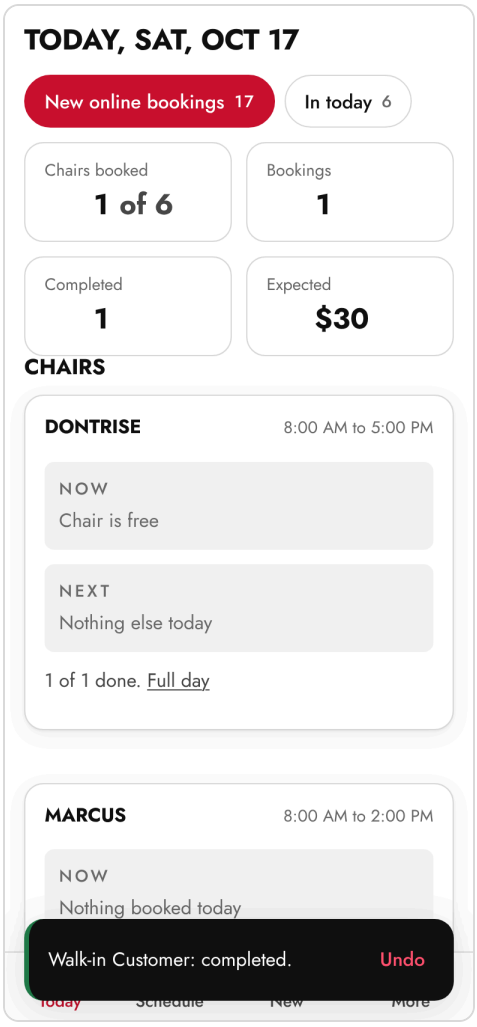

Next is who is coming after. Tap a name to see the booking.

MARKING A CLIENT DONE OR A NO SHOW, AND UNDO

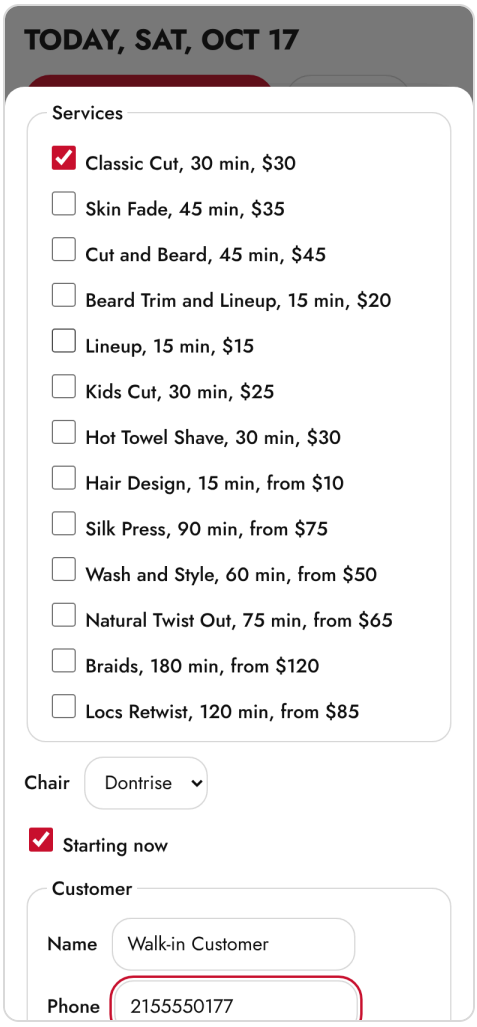

1. On Today, find the client on the chair card.
2. Tap **Completed** when they are done, or **No show** if they never came.
3. A small message appears at the bottom with **Undo**. Tap it within a few seconds if you pressed the wrong one.

ADDING A WALK-IN OR A PHONE BOOKING

1. Tap **New** at the bottom.
2. Pick **Walk-in** for someone standing in the shop (it starts now) or **Phone booking** for someone who called (you choose the day and time).
1. Tick the services, pick the chair, type the name and phone.
2. Tap **Book it**. Tick **Email the customer a confirmation** first if they gave an email and want one.

A phone booking follows the same rules as the website. If the time is too soon or outside hours, tick **Allow inside the lead time or past the booking window** to take it anyway.

BLOCKING TIME AND TAKING A DAY OFF

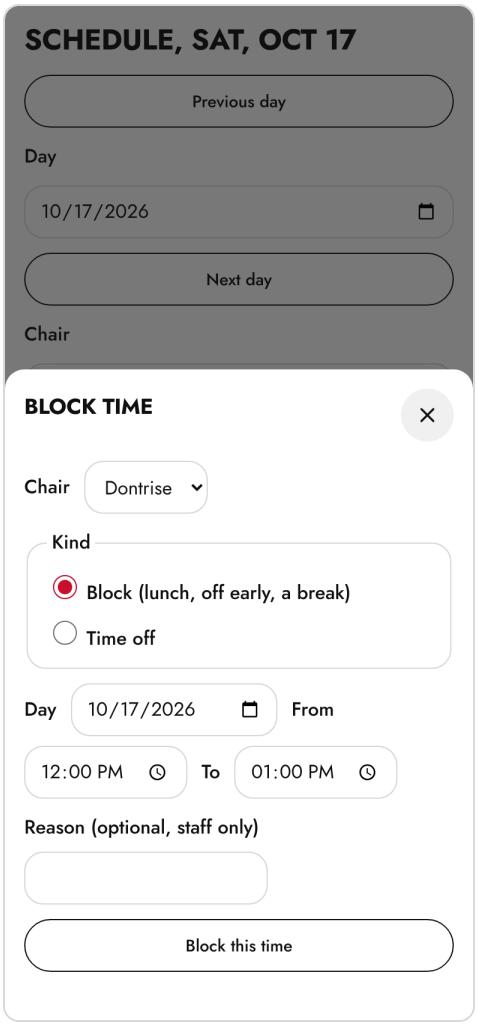

To block an hour (lunch, a break, a walk-in you want to protect):

1. Tap **Schedule** at the bottom, then **Block time**.
2. Pick the chair, the day, from and to. Add a reason if you like (only staff see it). Tap **Block this time**.

To take a whole day off, or mark someone off for the day:

1. Tap **More**, then **Who's in**.
2. Next to the barber, choose **Off today**. Choose **In** to put them back.

For a day the whole shop is closed: **More**, **Settings**, **Closures**, add the date.

WHEN A CHANGE CLASHES WITH BOOKINGS (KEEP OR CANCEL)

If you block time, mark someone off, change hours or remove a service and a booking already sits in that spot, the site stops and lists each booking it would affect. For each one, choose:

- **Keep as an exception**: the booking stays exactly as it is.
- **Cancel, do not tell the customer**: for walk-ins and people you have already spoken to.
- **Cancel and email the customer**: the customer gets an email with a link to pick a new time.

Nothing is changed until you choose for every booking in the list and tap the button at the bottom.

EDITING SERVICES, PRICES AND HOURS

1. Tap **More**, **Settings**. Services is the first tab.
2. Tap **Edit** next to a service to change its name, price, minutes or whether it can be booked online. **Add a service** adds a new one.
1. Prices with "from" show "From $40" on the website.
2. **Hours** is the next tab: the shop's opening hours for each day. Each barber has their own hours under **Staff**, on their card.

Removing a service keeps it on past bookings; the site asks about any future bookings that use it (see Keep or Cancel above).

ADDING A BARBER AND THEIR LOGIN

1. **More**, **Settings**, **Staff**, then **Add a staff member**. Type the name, the role, what they are known for, and the chair number. Tick **Show on the website** when they are ready to be seen.
1. Set their hours on their card.
2. Give them a login: **Settings**, **Logins**, **Create login**. Choose the staff member and type their email. The site shows a temporary password **once**. Send it to them. They must change it the first time they sign in.
1. If they forget the password: **Logins**, **Reset password**, and send them the new temporary one. **Disable** a login the day someone leaves.

The web address of each barber's page (yoursite/chairs/name) never changes, even if you rename them, so printed cards keep working.

UPLOADING PHOTOS AND WRITING ALT TEXT

1. Tap **More**, **Photos**.
2. **Hero** is the big photo on the home page. **Chairs** is each barber's portrait. **Gallery** is the work.
1. Tap **Choose a photo**, pick one from your camera roll, then write what is in the photo in **Describe the photo**. This is read aloud to people who cannot see it and shows if the photo fails to load. "Marcus, skin fade with a hard part" is better than "photo".
1. Tap **Upload photo**. The phone shrinks it before sending, so big photos are fine.
1. The first photo in a list is the one shown on the site. Use **Up** and

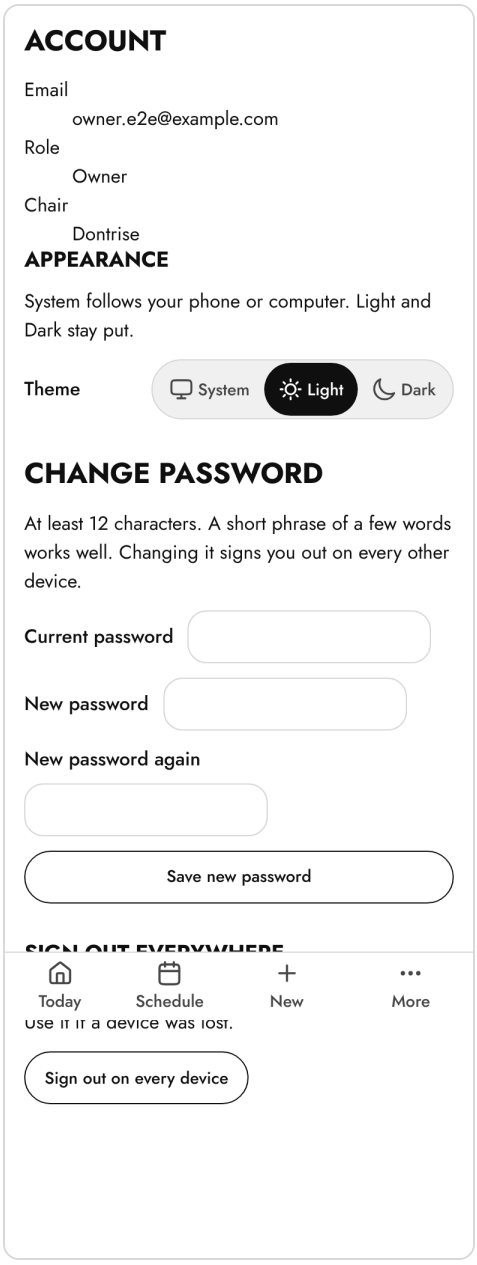

Down to reorder. **Remove** takes it off the site.

Portraits look best taller than wide. The hero looks best wide, with the person off to one side so the words fit over it.

TURNING THE LIGHT OR DARK THEME ON

Tap **More**, **Account**, then under **Appearance** choose **System** (follows your phone), **Light** or **Dark**. The public website has the same switch at the top right of every page.

WHO TO CALL WHEN SOMETHING IS WRONG

Visualize: **contact@visualizeclients.com**

Send a screenshot and what you were doing. If a customer saw an error, the error message has a code and a request id; include those.

If the website is down and people cannot book, you can still take bookings in the dashboard (**New**) and by phone. The website tells customers to call the shop while it is down.
